

PRODUCT INFORMATION SHEET

Structural Timber Screws - Wafer Head

Description:

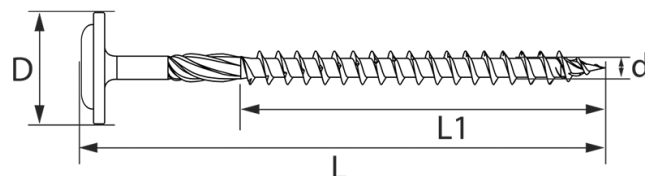

These construction, countersunk timber screws are perfect for connections to wooden beams and load-bearing timber structures.

The wide countersunk head provides a large bearing surface and clamping range, allowing the screws to withstand heavier loads and requiring fewer fastening points for a stable construction. The specially shaped tip also prevents the need for pre-drilling in most applications.

Key Attributes:

- ETA Certified and CE marked.
- TX-30 Countersunk Wafer Head.
- Steel Hardened, Zinc Plated Finish.
