

**PRODUCT INFORMATION SHEET**

## Standard Wedge Nuts - M6

### Description:

- Steel Wedge Nuts for hollow ribbed composite decking - To suspend threaded rods or services.
- Load ratings are dependent on the condition and capacity of the Concrete slab and Deck, which must be checked and examined in accordance with the manufacturers guidelines.\*
- The wedge nut must be locked into place using a nut or washer\*, or similar method.
- \*If using a washer, the diameter must exceed that of the channel or rib entrance to create a secure installation. The overall responsibility for this lies with the installer.
- Zinc Plated - Zinc Electroplated to BS EN 15048
